Dataset Tuning:
STRICT RULE REGARDING DATASET TUNING:
What is sarcasm?
What they say is not what they mean.

Early Fusion Model
-Extract the features of 3 models, delete last layers.
-Feed them into a FC layer, design the next layers.
-We will create different combinations of models, minimum 10.
-Train the early fusion model.

Target for Models
1. Best accuracy, precision.
2. Best lightweight.
3. fine-tuning/training speed/resources needed
